Yogyakarta, Indonesia (GMT+7) | US hours (EST/EDT) or flexible overlap

Full-Stack Developer with 5 years of experience building web applications, strongest in React, Next.js, Vue.js, and TypeScript, with backend experience in Express, Go, and PostgreSQL across e-commerce contract work and personal projects. Delivered a hospital management interface and a public platform reaching 90,000+ monthly visitors. Experienced in taking features from API and database design through to the user interface.

Work Experience

PT Mahakam Berkah Bersama - **Jakarta, Indonesia (Remote)** Jul 2025 - Jul 2026

Front-end Developer

- Built an accessible desktop interface for a Hospital Management System using Vue.js and Vuex, reducing data load time by 20% for clinical staff.
- Cut data fetching by 15% by Vuex state caching and lazy-loading across nurse and doctor assessment form.
- Refactored complex component logic into modular, reusable components, improving long-term maintainability.

TeknikHub and ZonaTools E-Commerce - **Indonesia (Remote)** Jul 2025 - Aug 2025

Full-Stack Developer

- Refactored an existing Next.js and Express.js monolith and added product catalog, cart, checkout, shipping, and admin dashboard modules, then deployed it for two stores with different products and markets.
- Built REST APIs for inventory and product management using Express.js.
- Integrated DOKU Wallet payment gateway into the checkout flow, including payment status updates, also the shipping checkout.

DM ID Group - **Jakarta, Indonesia (Remote)** May 2024 - Jul 2025

Front-end Developer

- Architected the core web application utilizing Next.js and Tailwind CSS, delivering a highly responsive and accessible user experience across multiple platforms.
- Optimized the SEO architecture, growing organic traffic to 90,000+ monthly visitors.
- Developed a robust administration dashboard using React, TypeScript, and Redux to efficiently manage main website content and monitor system performance.
- Integrated and optimized REST API calls between the Next.js frontend and the backend using Next.js fetch, adding loading and error states.

Midaz Senayan Gold - **Jakarta, Indonesia (Remote)** May 2025 - Jun 2025

Front-end Developer

- Refactored the existing custom React CMS codebase and added modules for table reservations, reward level and dashboard settings.

Binar Academy - **Jakarta, Indonesia (Remote)** Apr 2022 - Sep 2022

Frontend Web Developer (Subject Matter Expert)

- Designed and authored a front-end curriculum, from HTML/CSS and JavaScript to React, adopted by instructors to teach 200+ students.
- Built hands-on learning modules covering Git and Redux state management, ending with deployment to Vercel.
- Designed a capstone project where front-end students built web apps integrated with REST APIs from back-end and full-stack students, simulating real cross-team development.

PT Red Ant Colony - **Yogyakarta, Indonesia** Mar 2021 - Dec 2021

Frontend Engineer

- Built the UI layout of an internal back-office dashboard from scratch with Blade, jQuery, and CSS, including Inventory, Warehouse, Forecasting, and Staff modules.
- Wrote Laravel controllers when the team needed it, connecting the frontend to existing data structures.
- Tested and integrated REST API endpoints with the backend team using Postman to confirm correct data flow.

Education

Universitas Islam Indonesia - **Yogyakarta, Indonesia** Aug 2010 - Aug 2017

Bachelor of Informatics Department

Projects

Personal Expense Tracker

Full-Stack Developer

https://expense-tracker.miftahulhabib.my.id/ - https://github.com/swiftahul20/personal-expense-tracker-app

- Built a REST API in Go with JWT authentication, bcrypt password hashing, refresh token rotation, and login rate limiting.
- Enforced per-user data isolation across all queries and added pagination, search, date filters, and CSV export on the expense endpoints.
- Containerized the API and PostgreSQL with Docker Compose, documented endpoints with Swagger and deployed them into a VPS behind Caddy.

Chat Messenger

Full-Stack Developer

https://chat.miftahulhabib.my.id/ - https://github.com/swiftahul20/personal-messenger

- Built a real-time chat server in Go using goroutines, channels, and a hub/broadcast pattern, supporting presence, 1:1 messages, and group rooms.
- Integrated an AI chat bot powered by the Gemini API with rate limiting, a daily usage cap and commands to control API usage.
- Persisted messages in PostgreSQL so chat history can be retrieved after reconnecting.
- Wrote unit tests with Go's testing package for user input validation, including reserved bot username and case-insensitive checks.
- Shipped the backend and Vue frontend as Docker images and deployed them to a VPS behind Caddy.

Skills

- **Frontend**: TypeScript, JavaScript, React, Next.js, Vue.js (Vue 2/3), Redux, Zustand, Pinia, Vuex, HTML/CSS, Tailwind CSS, Framer Motion, jQuery.
- **Backend**: Node.js, Express.js, Go, Laravel, REST API design, JWT authentication.
- **Integrations**: WebSocket, DOKU payment gateway, Gemini API.
- **Databases**: PostgreSQL, MongoDB
- **DevOps and Tools**: Docker, Docker Compose, Linux (VPS), Caddy, Git/GitLab, Postman, Swagger, Go testing, Figma
- **Practices**: Agile/Scrum, Technical Documentation, English (professional working proficiency)
